

## Initial Project Planning Template

|               |                                 |
|---------------|---------------------------------|
| Date          | 15 July 2026                    |
| Team ID       | SWTID-2026-4735                 |
| Project Name  | Credit card Approval Prediction |
| Maximum Marks | 5 Marks                         |

### Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create a product backlog and sprint schedule

| Sprint          | Functional Requirement (Epic)   | User Story Number | User Story / Task                                                                                                                                           | Story Points | Priority | Team Members         | Sprint Start Date | Sprint End Date (Planned) |
|-----------------|---------------------------------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------|----------------------|-------------------|---------------------------|
| <b>Sprint-1</b> | Data Collection & Preprocessing | USN-1             | As a developer, I want to collect applicant and credit history datasets so that the model can be trained using reliable data.                               | 3            | High     | Shaik Manjusha       | 01-06-2026        | 07-06-2026                |
| <b>Sprint-1</b> | Data Preprocessing              | USN-2             | As a developer, I want to clean, preprocess, and encode the dataset so that it can be used for machine learning.                                            | 5            | High     | Taddi Suryamma       | 01-06-2026        | 07-06-2026                |
| <b>Sprint-2</b> | Machine Learning Model          | USN-3             | As a developer, I want to train and evaluate the Random Forest model so that it can accurately predict credit card approval.                                | 8            | High     | Abhilash Yadav       | 08-06-2026        | 15-06-2026                |
| <b>Sprint-2</b> | Model Evaluation                | USN-4             | As a developer, I want to evaluate the trained model using accuracy, precision, recall, F1-score, and ROCAUC so that the best-performing model is selected. | 3            | High     | Ramavath Supriya bai | 08-06-2026        | 15-06-2026                |

|                 |                             |       |                                                                                                                                               |   |      |                                                                      |            |            |
|-----------------|-----------------------------|-------|-----------------------------------------------------------------------------------------------------------------------------------------------|---|------|----------------------------------------------------------------------|------------|------------|
| <b>Sprint-3</b> | Web Application Development | USN-5 | As a user, I want to enter my personal and financial details through a web interface and instantly receive a credit card approval prediction. | 8 | High | Shaik Manjusha, Taddi Suryamma, Abhilash Yadav, Ramavath Supriya bai | 16-06-2026 | 25-06-2026 |
|-----------------|-----------------------------|-------|-----------------------------------------------------------------------------------------------------------------------------------------------|---|------|----------------------------------------------------------------------|------------|------------|
